-
-
-
-

Fast finishers Can you think of some other ways to look after the environment? Write three sentences using *should* and *shouldn't*.

How do you feel? Write.
.....

- 1 Read the article. Underline the ways that plants help us.

Brilliant plants

Do you want to protect our planet? Then you should look after plants and the animals that live near them.

Plants are brilliant! I love eating fruits and vegetables. Plants make the air clean, and they help us stay cool when it's hot. They are homes for birds, insects and animals, and they're beautiful, too.

We should ...

- grow plants that help bees and insects.
- water plants and protect them.
- plant trees to help the environment.
- look after forests and parks.

We shouldn't ...

- pollute forests and parks.
- throw litter on plants and their environment.
- hurt or step on plants.

- 2 Rewrite the advert in your notebook using the correct punctuation.

do you want to protect our planet then you should look after insects and the places that they live insects are brilliant they help plants grow they help clean our environment and they are beautiful of course bees make honey too

- 3 Write an article about our oceans for a children's magazine.

- What is brilliant about oceans?
- Do they help us? How?
- What lives in them?
- How should we protect them?
