In warm oceans there are coral reefs. Coral reefs look like rocks, but they're really made of millions of tiny animals. Coral needs a lot of sunlight to grow well. Coral reefs are home to thousands of fish and other sea animals. They're like busy cities underwater.

You can find sea anemones in every coral reef. Sea anemones look like plants, but they are really animals. They catch small fish with their tentacles. But this clownfish is the sea anemone's friend. The sea anemone protects the fish, and the fish cleans the sea anemone.
